

ENGAGE_YOUTH: Digital tools for participation and active citizenship
Module three residential
ENGAGE_digital broadcast

Module three: Programmed by Medienhaus-Hannover

Aims:

Establishing a basic knowledge in the area of new network-based digital communication devices. Development and construction of a UMTS / Web- TV broadcast with several cameras. Exchange of experiences of all participants concerning the new digital communication possibilities. Development of new ways to utilize such technology responsibly when working with young people.

Actions:

- Introduction of digital communication devices and their application possibilities.
- Production of short-format film projects with Flash-Card video cameras
- Production of an „emotional road description“
- Introduction and realisation of Internet-radio streams
- Supporting the participants to design and realise a UMTS / web TV broadcasting.
- Supporting the participants to develop new approaches to their practice which apply these technologies
- Discussion and development of new cooperation possibilities and cross-linkings.
